

# Intelligent Logistics & Transportation

BY BLS GROUP

## Who are we

BLS Group is an independent Transport Consultancy that provides a range of services and products for large and small fleet operators. We cover the UK and are based in the Southeast.

We provide a complete range of transport services from Interim and external transport managers to reducing cost and emissions.

We have a team of highly experienced consultants that can deliver change, and we can provide a range of bespoke software to improve management control, identify high risk activity, reduce both carbon and cost.

- Cycle to Work
- Train booking
- Car Share Booking
- Staff Travel Platform
- Intelligent Automated Transport Platform

## Staff Travel Site

## Fleet Management

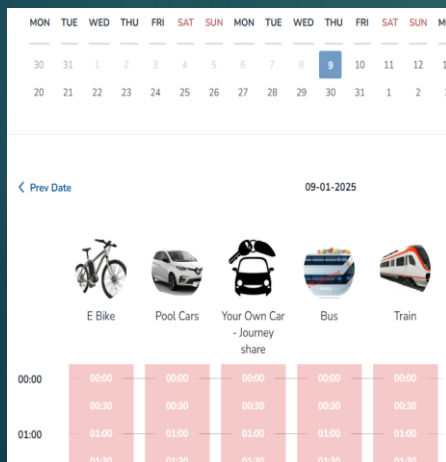

## Intelligent Logistics

## Cycle Site

## Booking Platform

These are just a few examples of our bespoke range of dedicated sites. All sites can be integrated to our real time Intelligent platforms to create instant networks which will consolidate people with goods or various forms of transport to reduce both Carbon, Costs and provide total mobility.

Using this approach, we can reduce costs by 30% and Carbon by 50%. Even with our costs the client will still reduce both cost and carbon, a win win in 2025

# Benefits

- 30% reduction in cost
- 50% reduction in emissions
- Step change towards Net Zero
- Improved ESG
- Fully managed
- Low risk
- Initial trial running alongside existing suppliers

# Logistical Efficiency and Coordination

- Reduction on travel time and/or cost
- Lower emissions
- Optimised routes
- Lower waiting times
- Emergency response

# Conclusion

Our solution will deliver 30% savings plus a 50% reduction in emissions.

This is a low-risk proposal, if we don't make savings, we don't get paid.

In our first phase we will assess the savings that we believe that can be made. We have proven systems, people and processes to ensure we deliver what we recommend.
